

Tisory Consulting Services Catalog

Empowering Engineering Leaders with Systems Thinking for Innovation and Impact

1. Systems Thinking Awareness & Capability Building

Equip your teams to handle complexity with clarity.

- **Introductory Workshops** (*60–90 minutes*)
Understand the fundamentals of Systems Thinking with real-world engineering case studies.
- **Hands-On Capability Workshops** (*1–2 days*)
Dive deeper with tools like Causal Loop Diagrams, Iceberg Model, and Archetypes to explore hidden system dynamics.
- **Executive Education & Leadership Alignment**
Tailored sessions for CXOs, VPs, and R&D leaders to integrate Systems Thinking into strategy, governance, and culture

2. Complex Problem Solving & Strategic Facilitation

Tackle pressing challenges with systemic clarity.

- **Problem-Solving Clinics**
Co-facilitated sessions to dissect recurring quality issues, rework, delays, or poor cross-functional collaboration.
- **Root Cause Mapping for Product & Process Issues**
Go beyond the surface with causal mapping, discovering feedback loops and leverage points.
- **Innovation Deadlock Resolution**
Break through siloed thinking and misalignment in innovation projects using systems facilitation.

3. Consulting for End-to-End Product Innovation

Make innovation predictable, efficient, and customer-centric.

E2E Innovation Process Design using Systems Science

Align customer needs, design, R&D, and operations with a whole-system view.

Cross-Functional Alignment for NPI/NPD Programs

Diagnose disconnects and optimize collaboration across departments and geographies.

Designing for Sustainability & Resilience

Embed future readiness and long-term impact in your engineering and innovation systems.

4. Organization-Wide Systems Thinking Deployment

Embed systems thinking as a core capability.

Roadmap Design & Deployment Strategy

Tailored rollout plans for spreading Systems Thinking across teams and functions.

Train-the-Trainer Programs

Build internal champions who can coach others and sustain the practice.

Custom Toolkits & Job Aids

Visual templates, checklists, and practical tools for day-to-day use in engineering teams.

5. Speaking Engagements, Webinars & Podcasts

Inspire your team or audience with thought leadership.

- **Keynote Talks & Webinars**

Ideal for internal innovation days, engineering forums, or industry conferences.

- **Podcast Series for Employee Awareness**

Client success stories, Systems Thinking simplified, and real-world impact

6. Strategic Advising & Retainers

Ongoing partnership for lasting transformation.

- **On-Demand Advisory (Monthly Hours Model)**
For VPs, Heads of Engineering, and R&D leaders needing regular strategic inputs.
- **Quarterly Reflection & Retrospective Facilitation**
Step back, assess patterns, and recalibrate for the next quarter using a systems lens.

Outcomes You Can Expect

- Shorter product development cycles
- Fewer design and rework loops
- More aligned cross-functional teams
- Innovation that solves the right problem
- Empowered leaders who can handle complexity with confidence
